

# Creating Lambdas by Chaining and Composing Other Lambdas

---

**José Paumard**

PHD, JAVA CHAMPION, JAVA ROCK STAR

@JosePaumard <https://github.com/JosePaumard>

# Agenda

How to chain and compose lambdas

How to create lambdas with factory methods

# Chaining and Composing Lambdas

---

You can create new lambdas by combining existing lambdas:

- consumer
- predicate
- function

You can also modify lambdas

# Creating Lambdas with Factory Methods

---

Comparators are lambdas created from functions

They can be modified

You can create new lambdas by combining existing lambdas of different types

# Module Wrap Up

What did you learn?

Combine lambdas of different types

To create other lambdas

How the Comparator API  
has been designed

# Course Wrap Up

What did you learn?

How to write lambdas:

- identify the method to implement
- implement that method

How to invoke a lambda

How to combine and modify lambdas

# Course Wrap Up

# Thank you!
