Observable Composition and Filtering

“Cold” vs “Hot” Observables

Observable Creation Methods

Marble Diagrams

Stream Filter Operators

Positional Operators

Time-Based Operators

Cold vs. Hot Observables

Cold Observables

Like listening to a podcast. Each subscriber can hear the whole podcast.

Hot Observables

Like watching broadcast TV without a DVR. You only get data from the point you tune in.

Demo

Observable Creation Methods

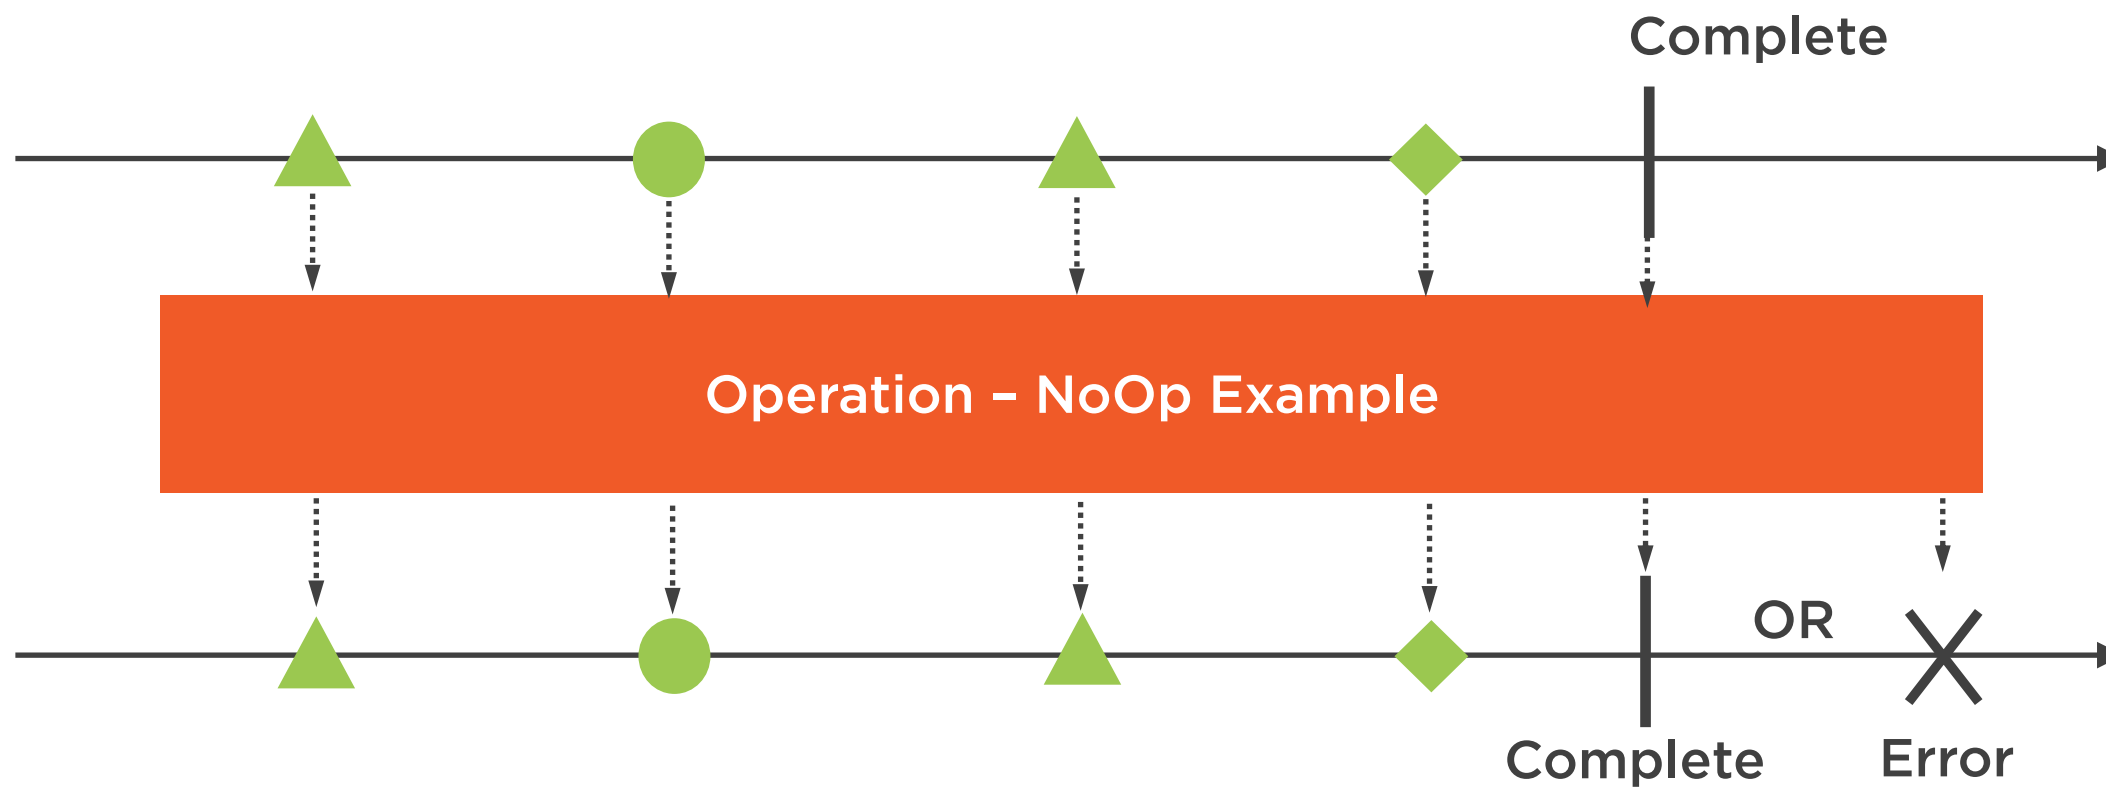

- just
- fromXXX
- create
- generate
- Cold vs Hot Observables

Marble Diagrams

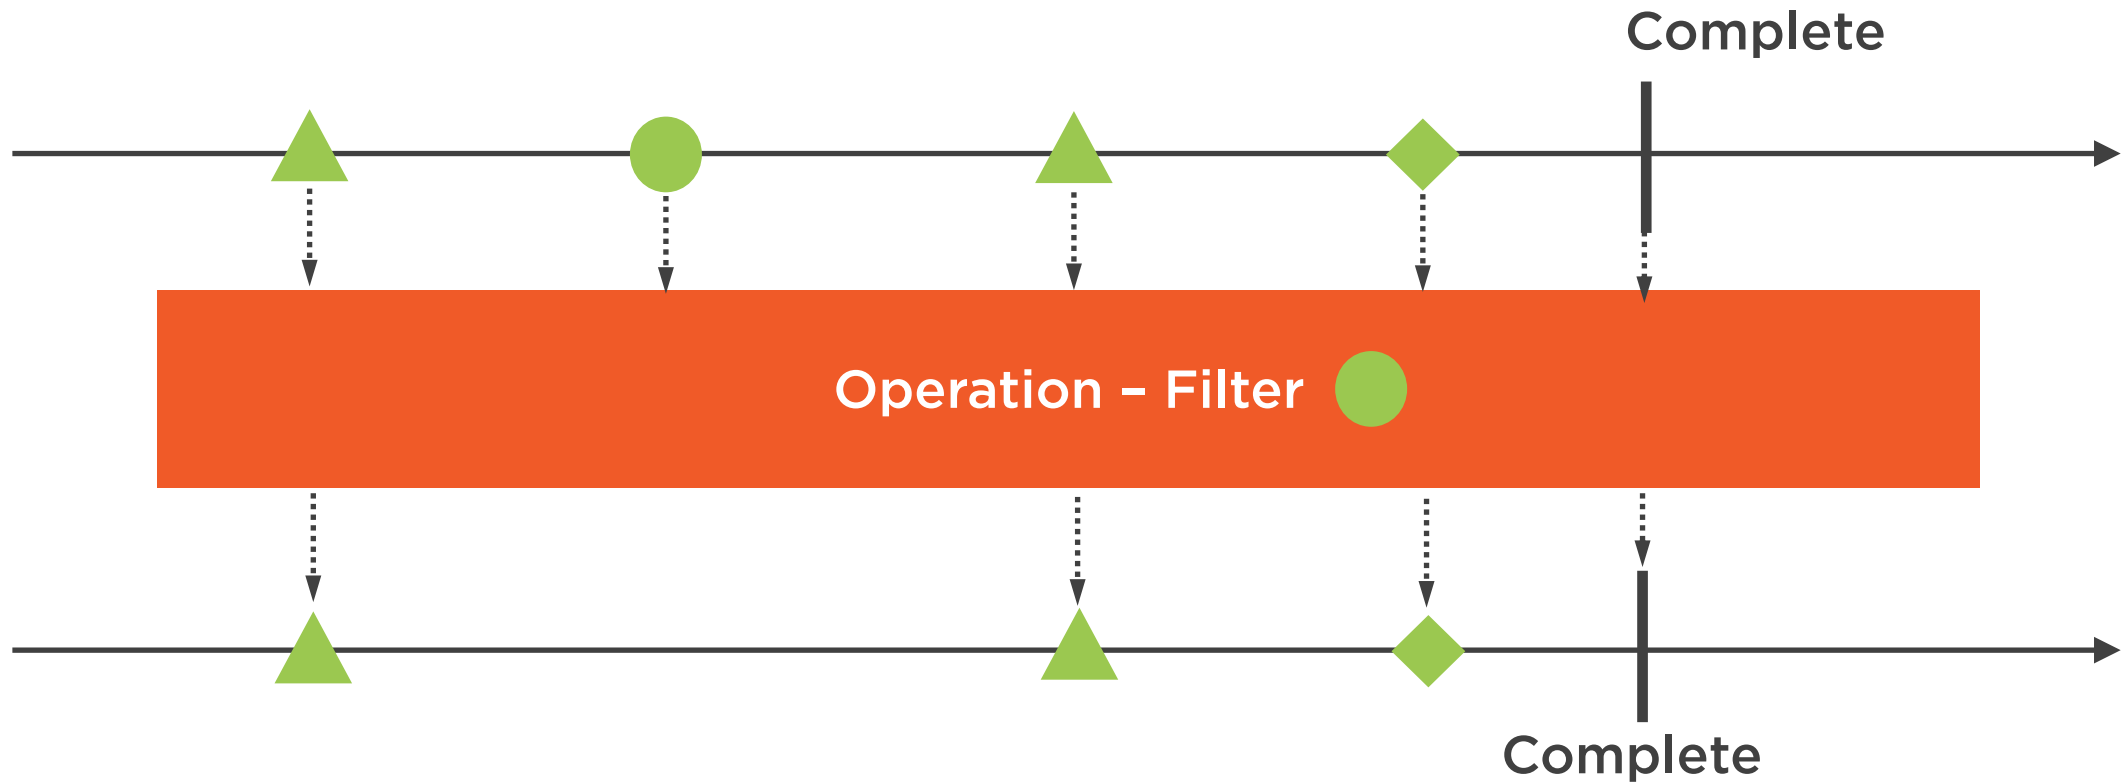

Marble Diagrams

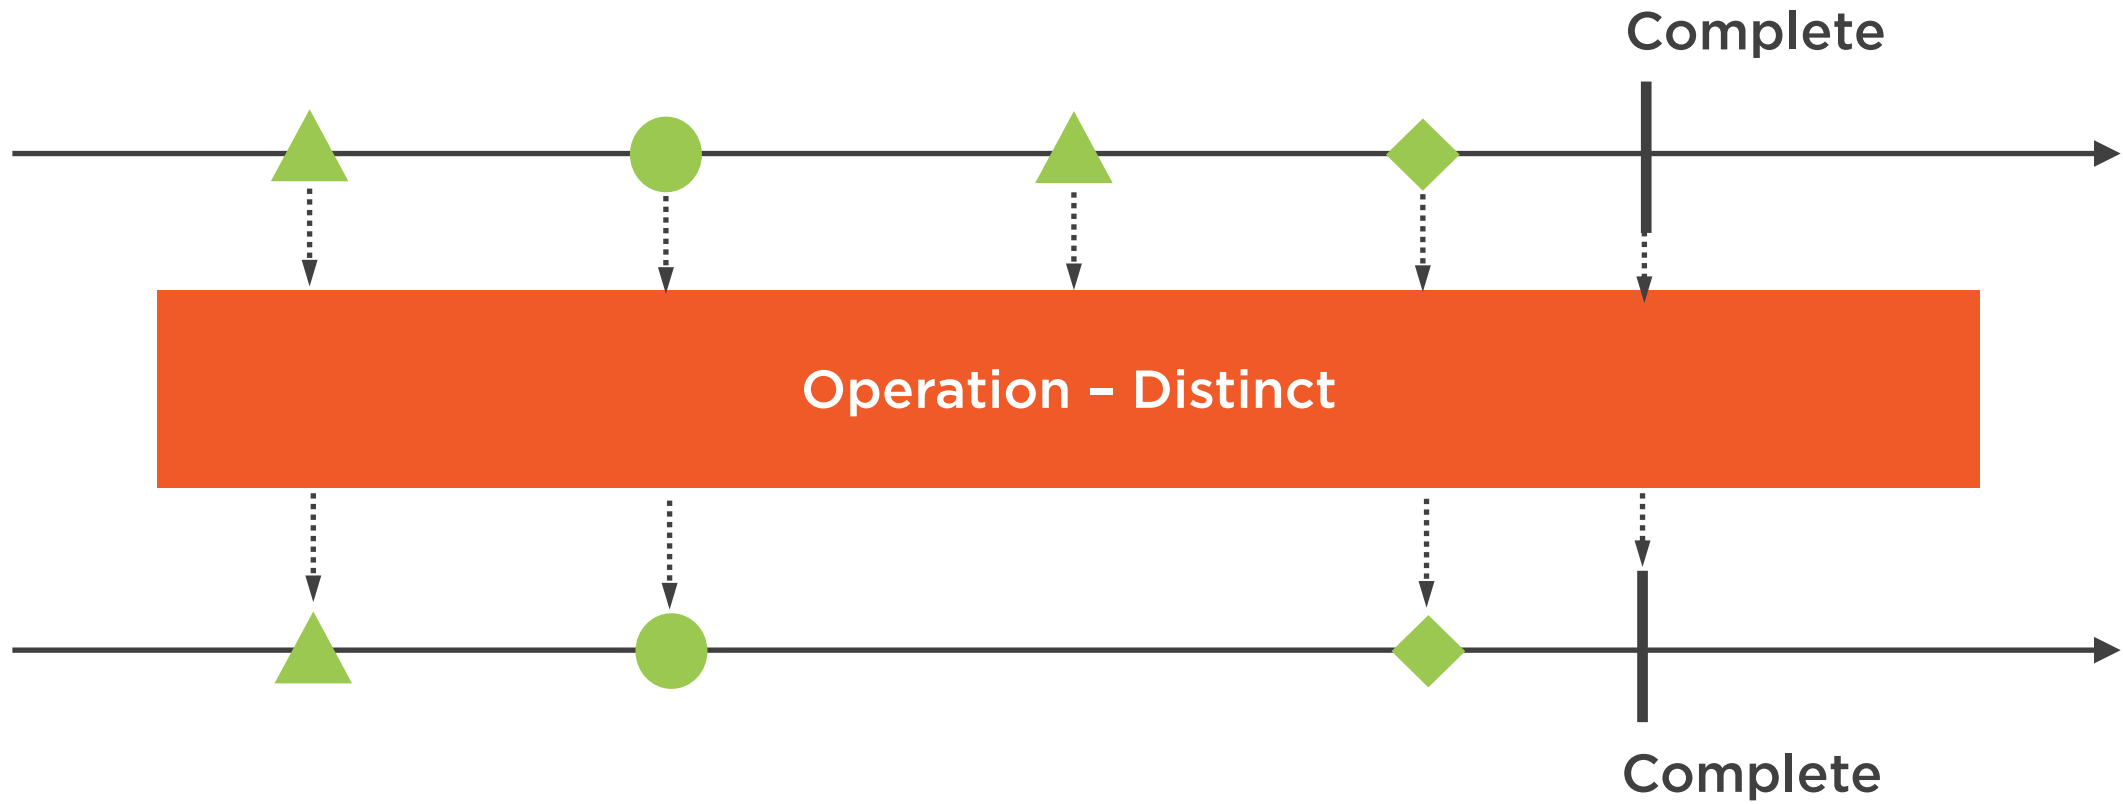

Stream Filter Operators

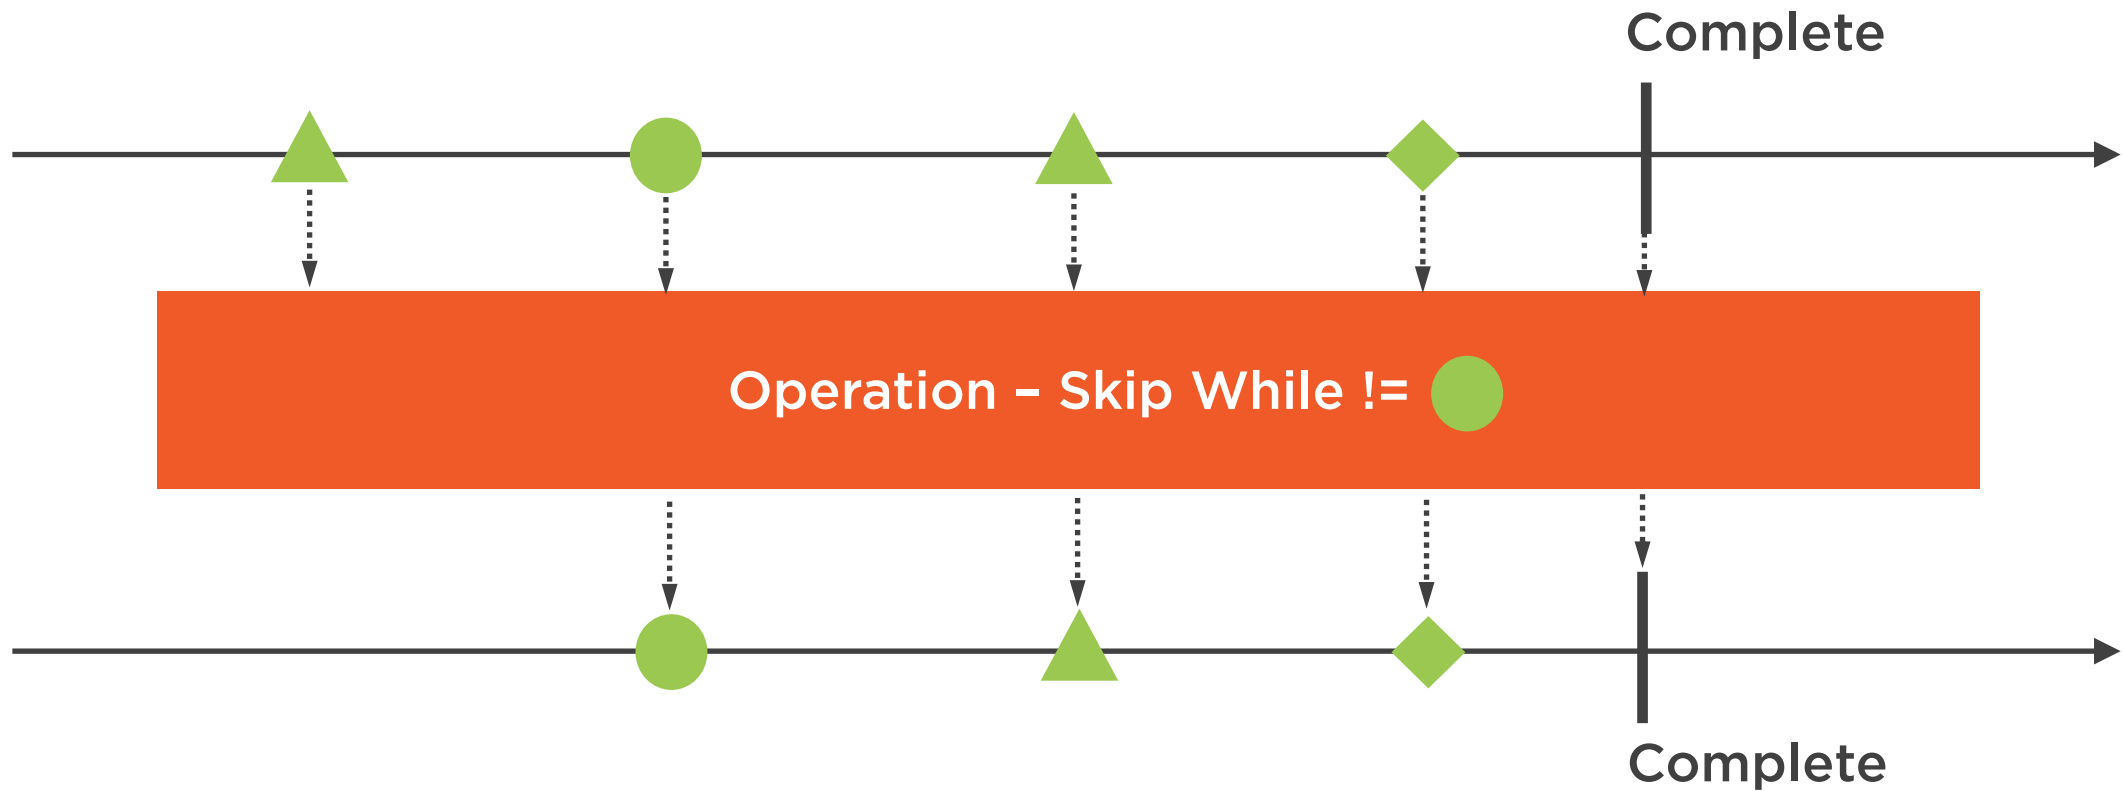

“filter” Operator

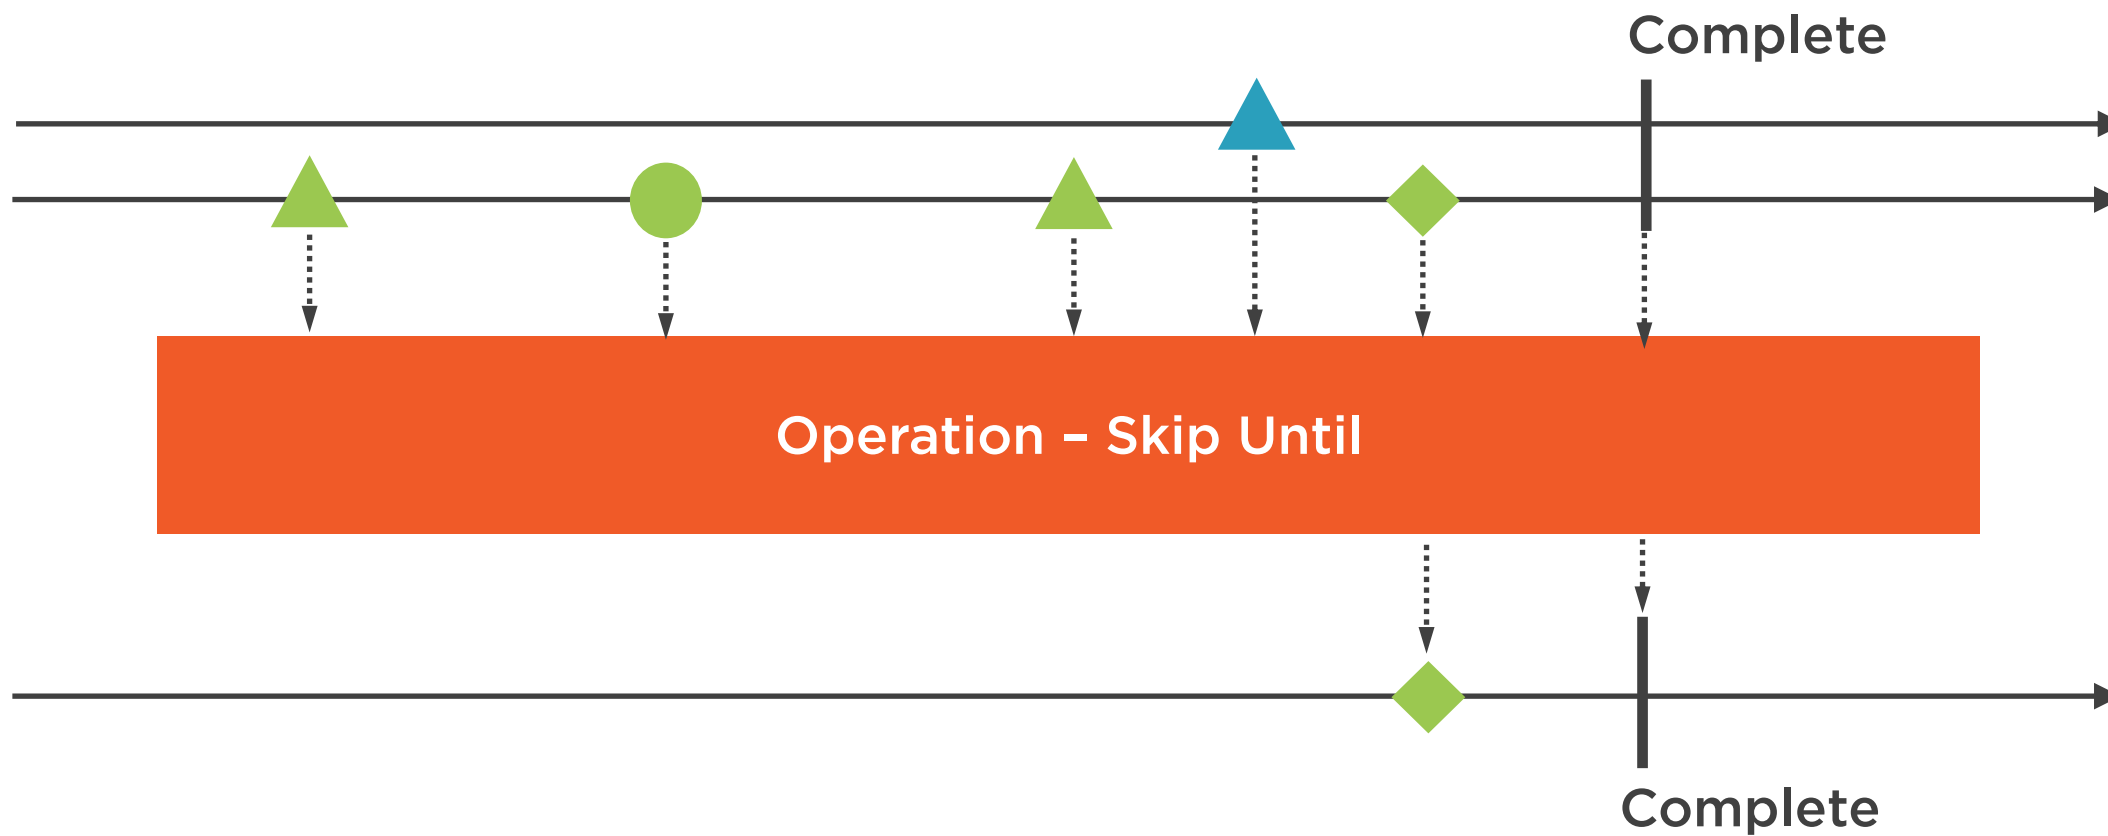

“distinct” Operator

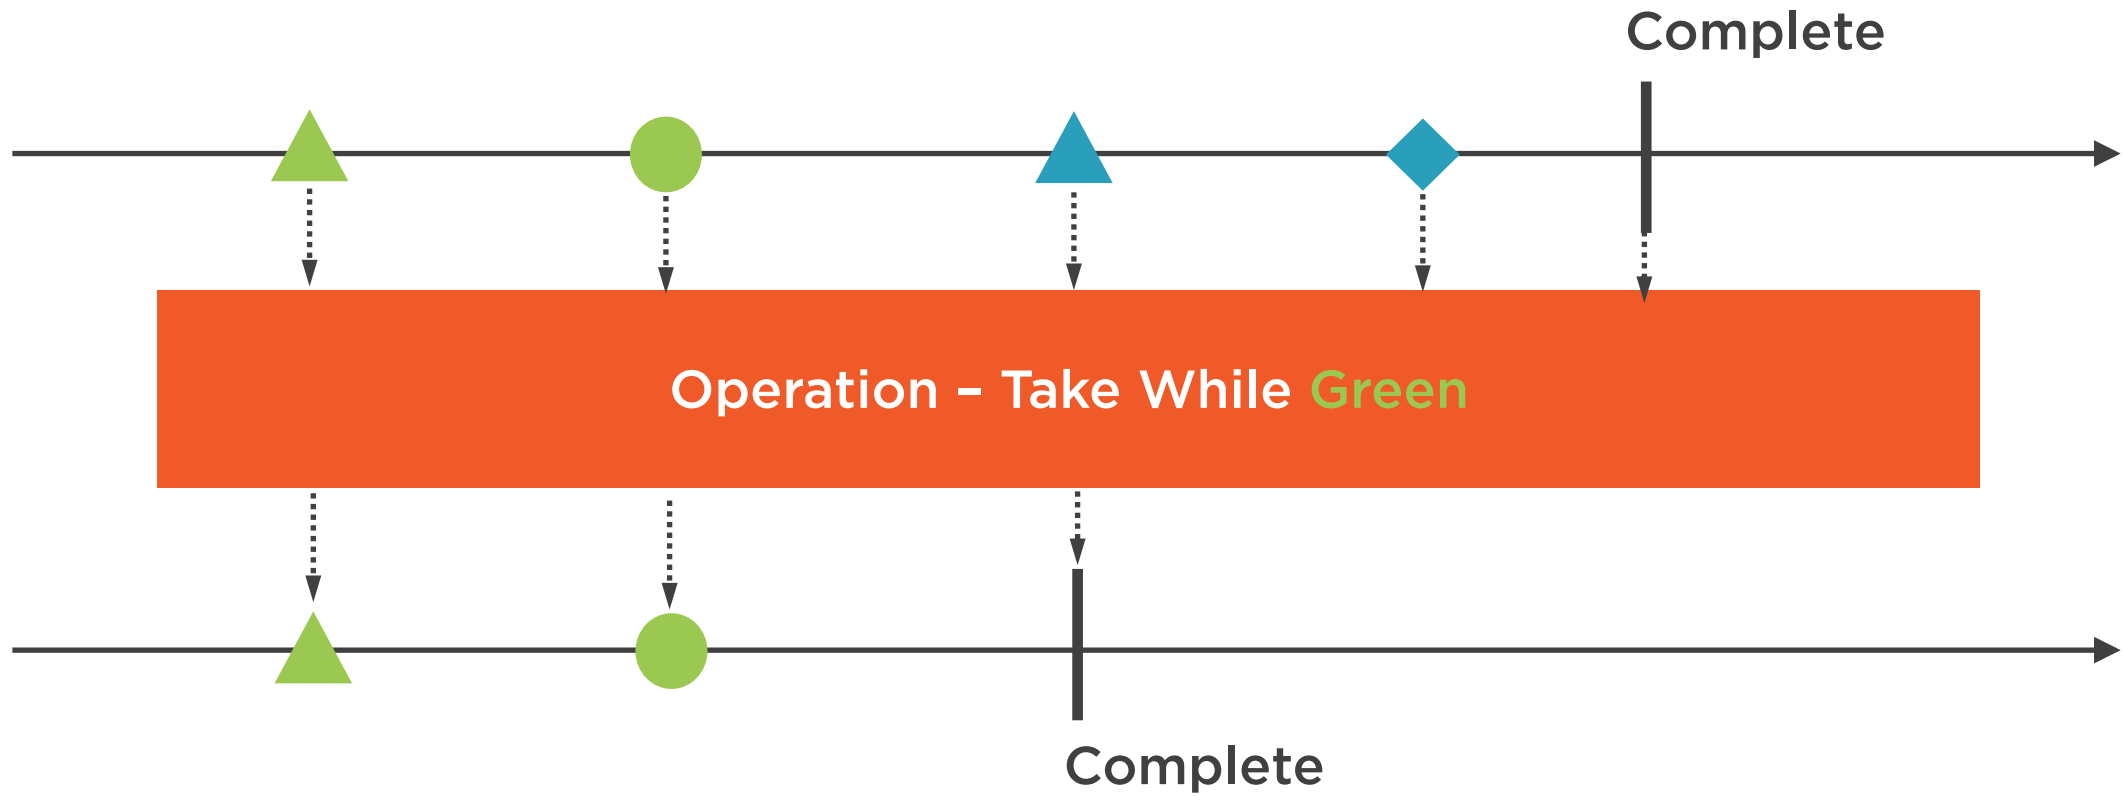

“skipWhile” Operator

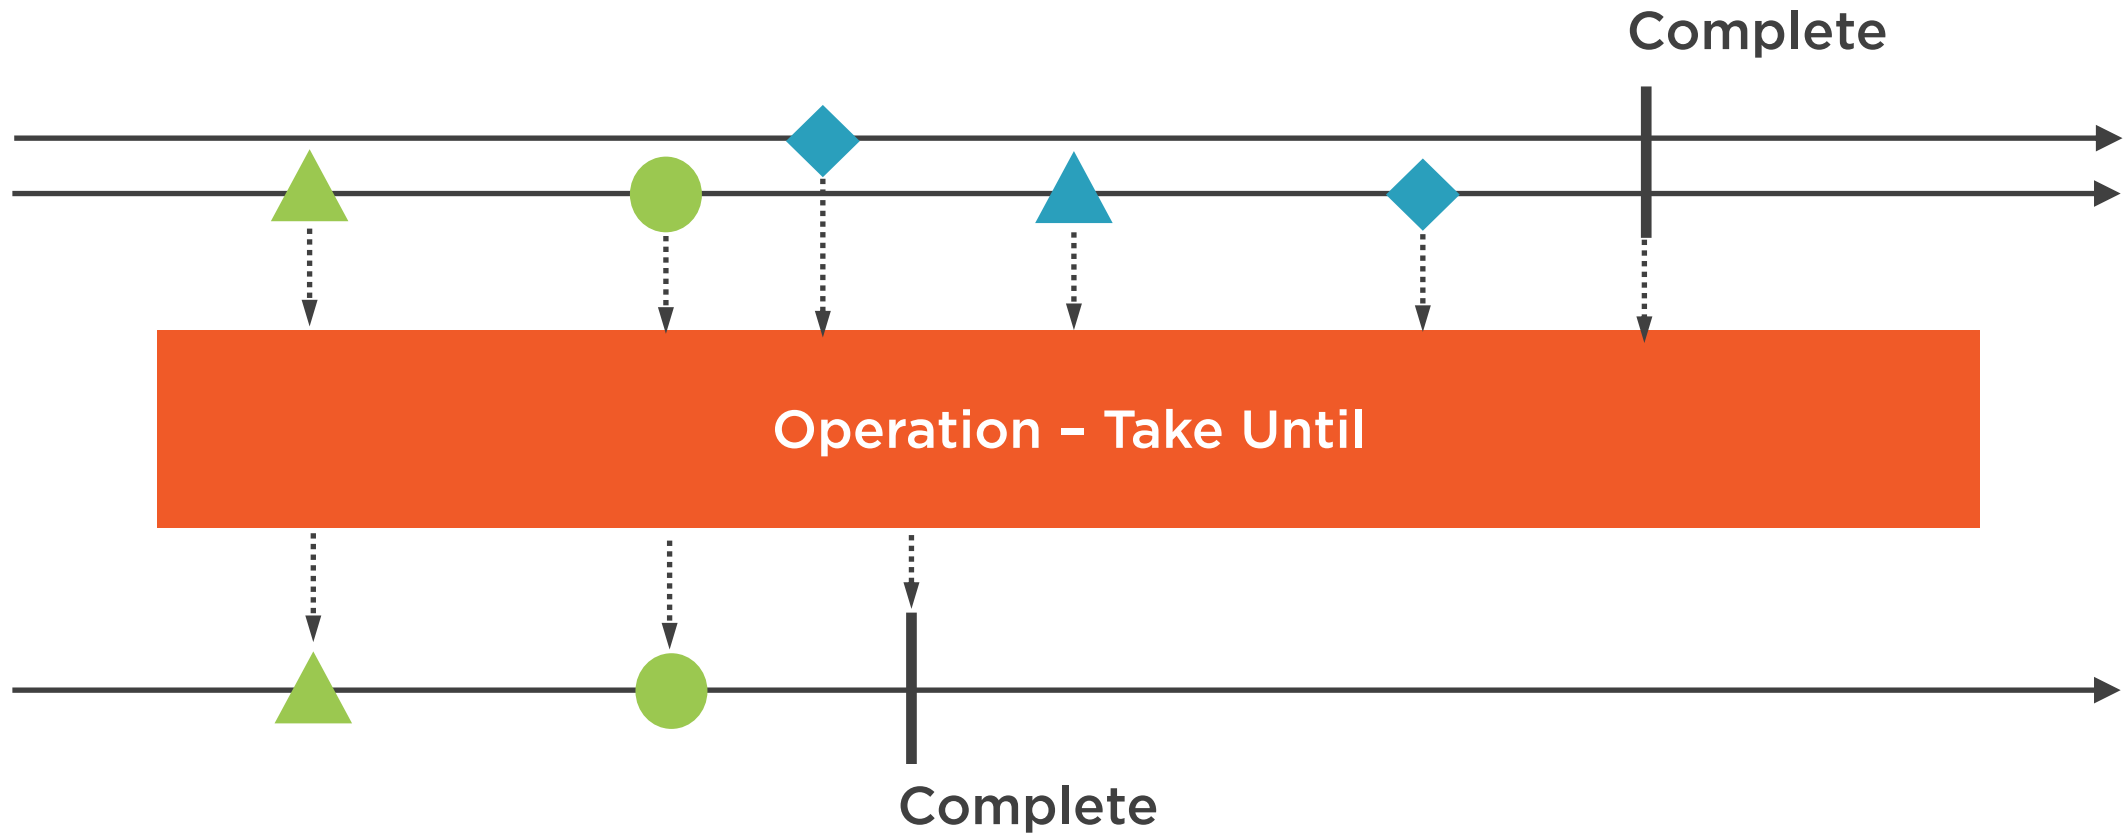

“skipUntil” Operator

“takeWhile” Operator

“takeUntil” Operator

Demo

Stream Filter Operators

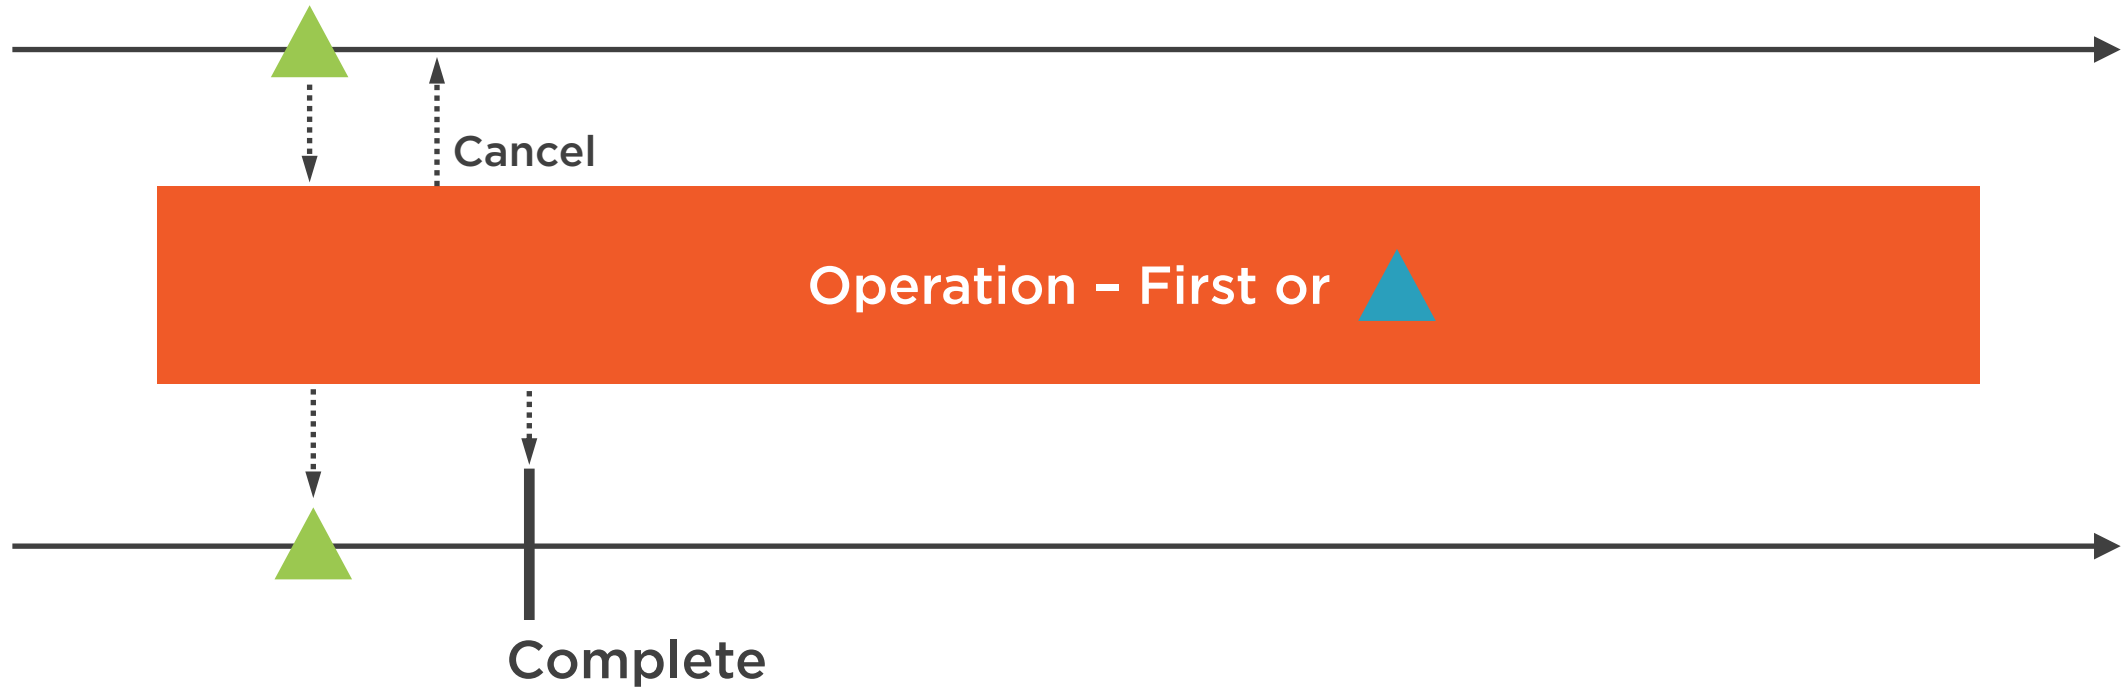

- filter
- distinct
- skipWhile
- skipUntil
- takeWhile
- takeUntil

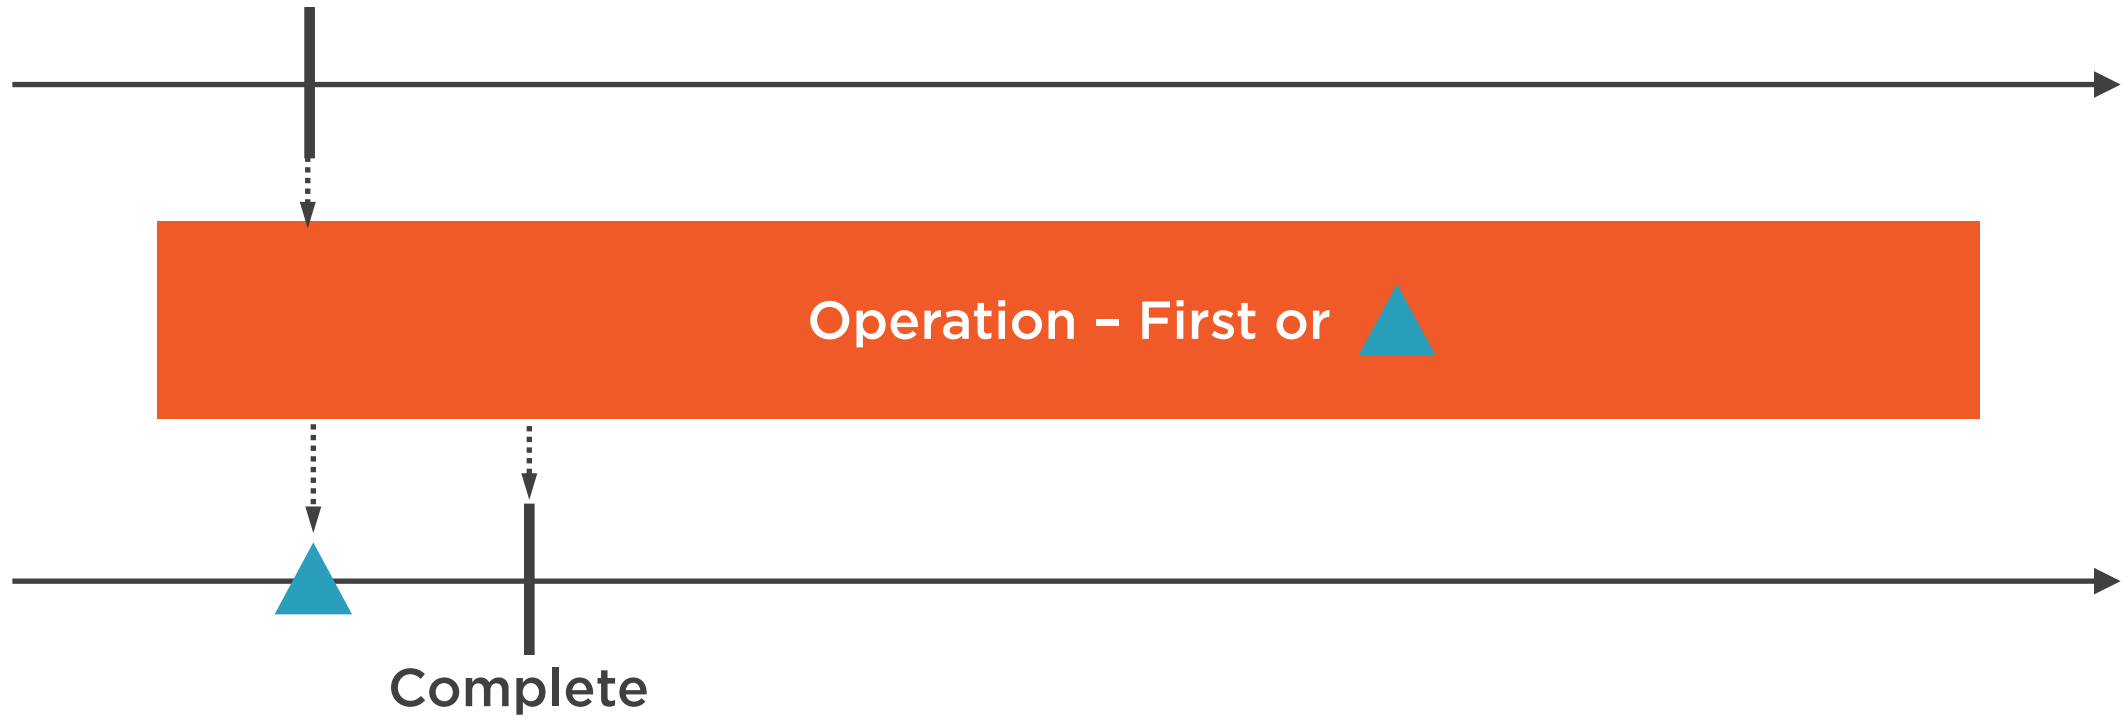

Positional Operators

“first” Operator

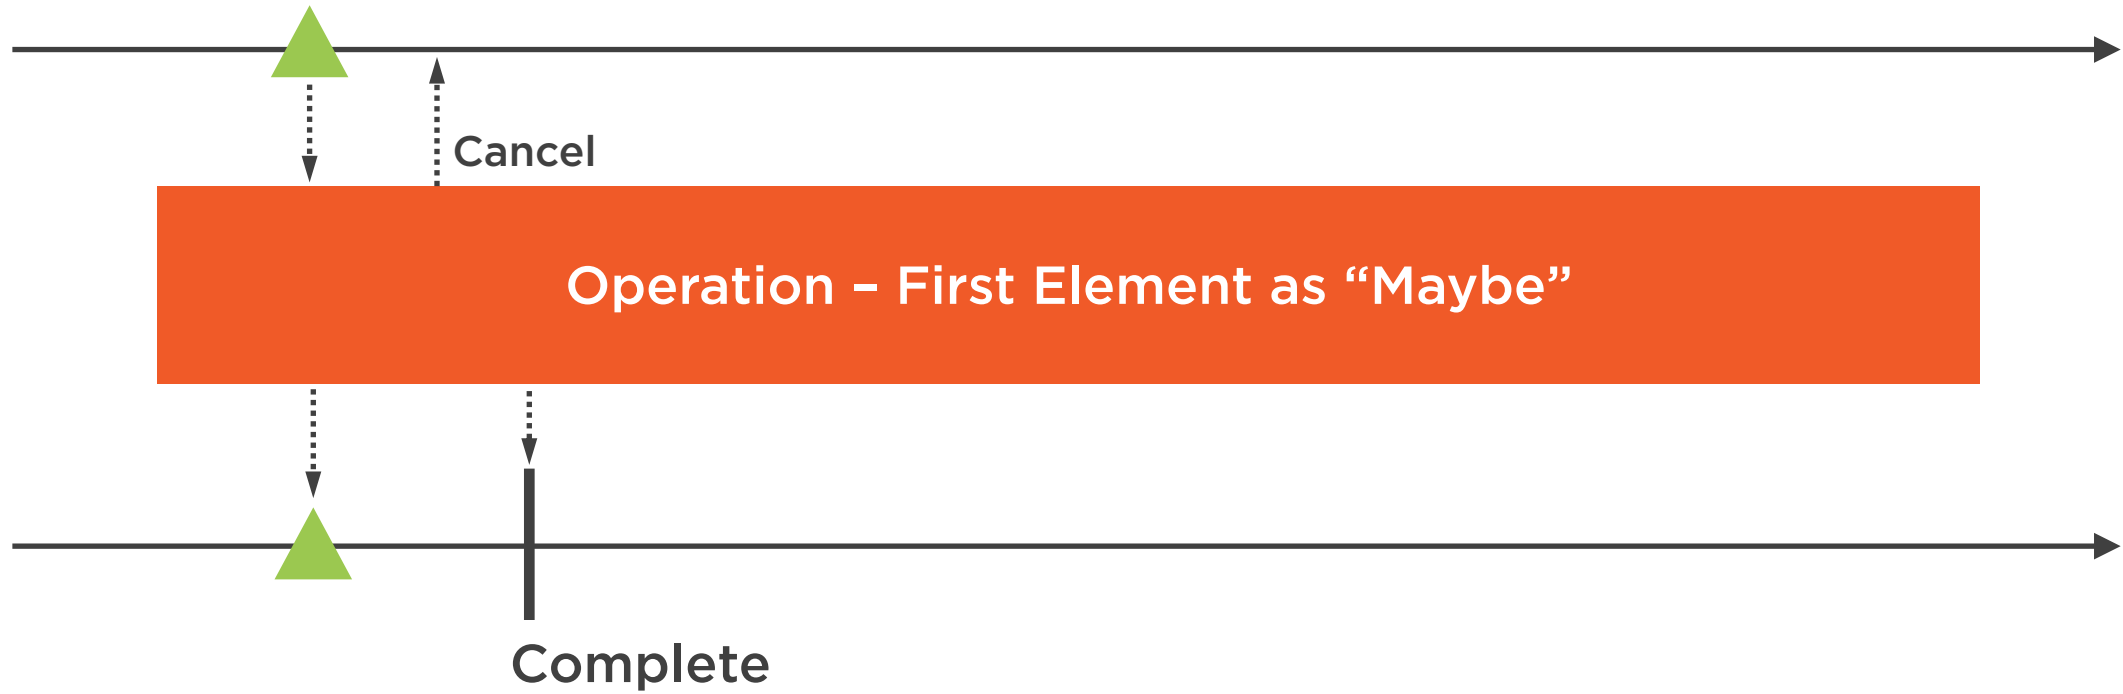

“first” Operator

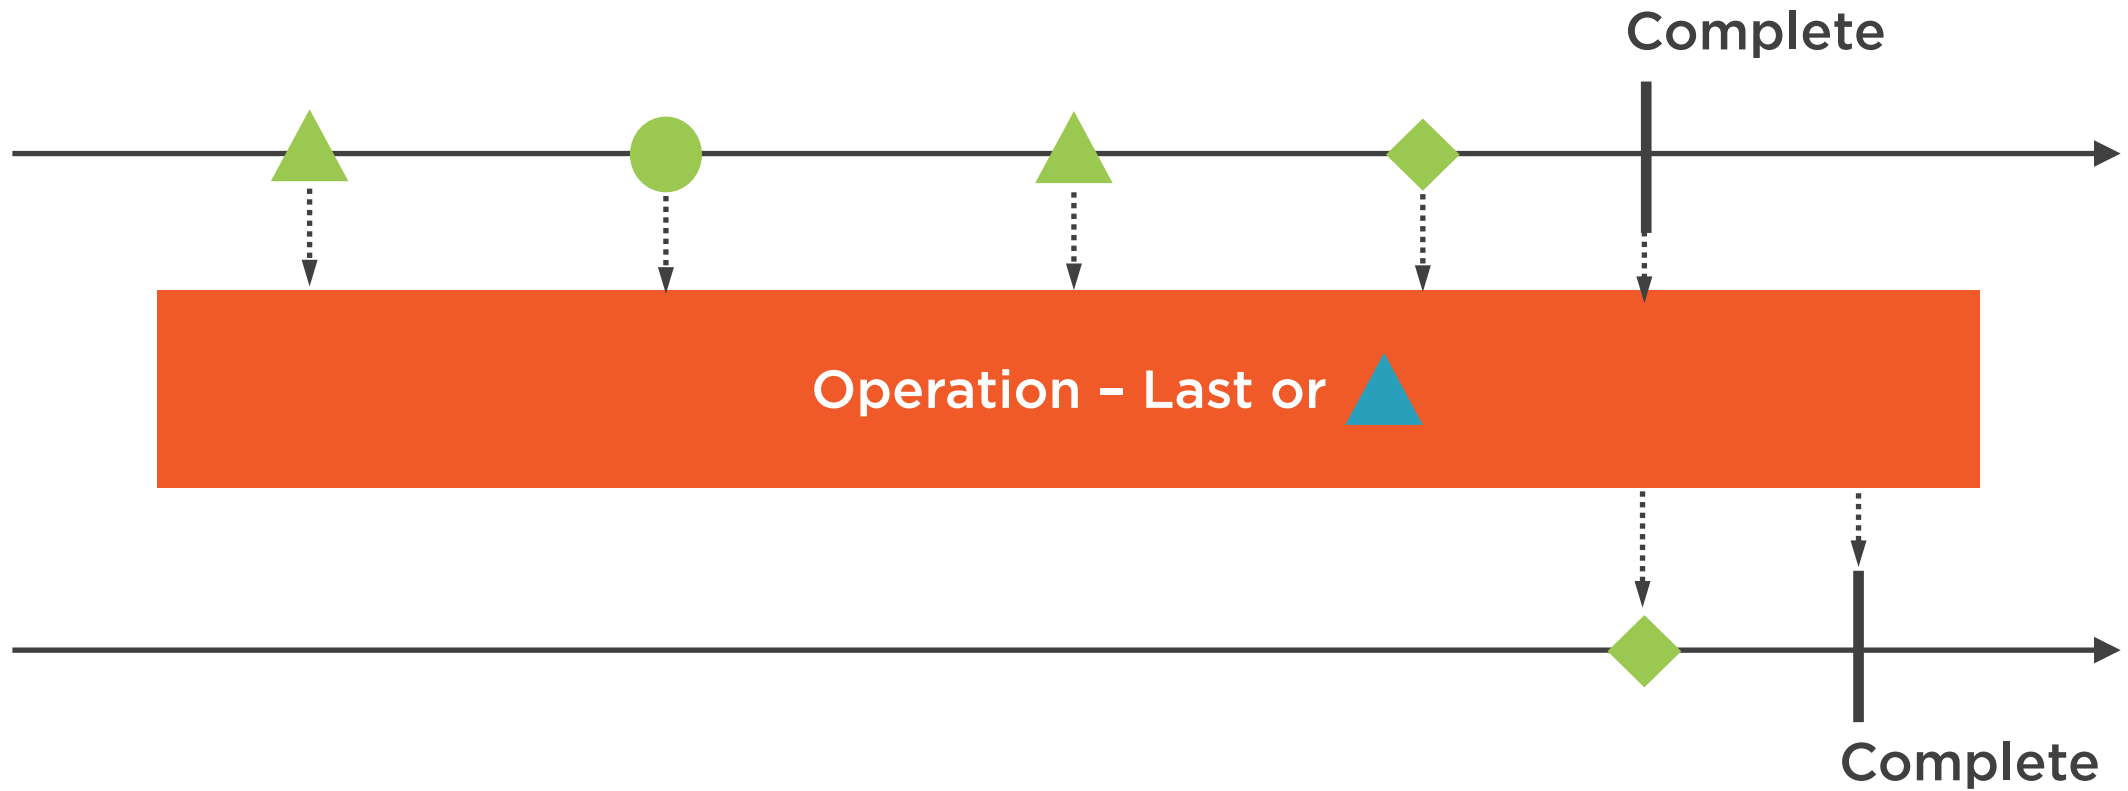

“firstOnError” Operator

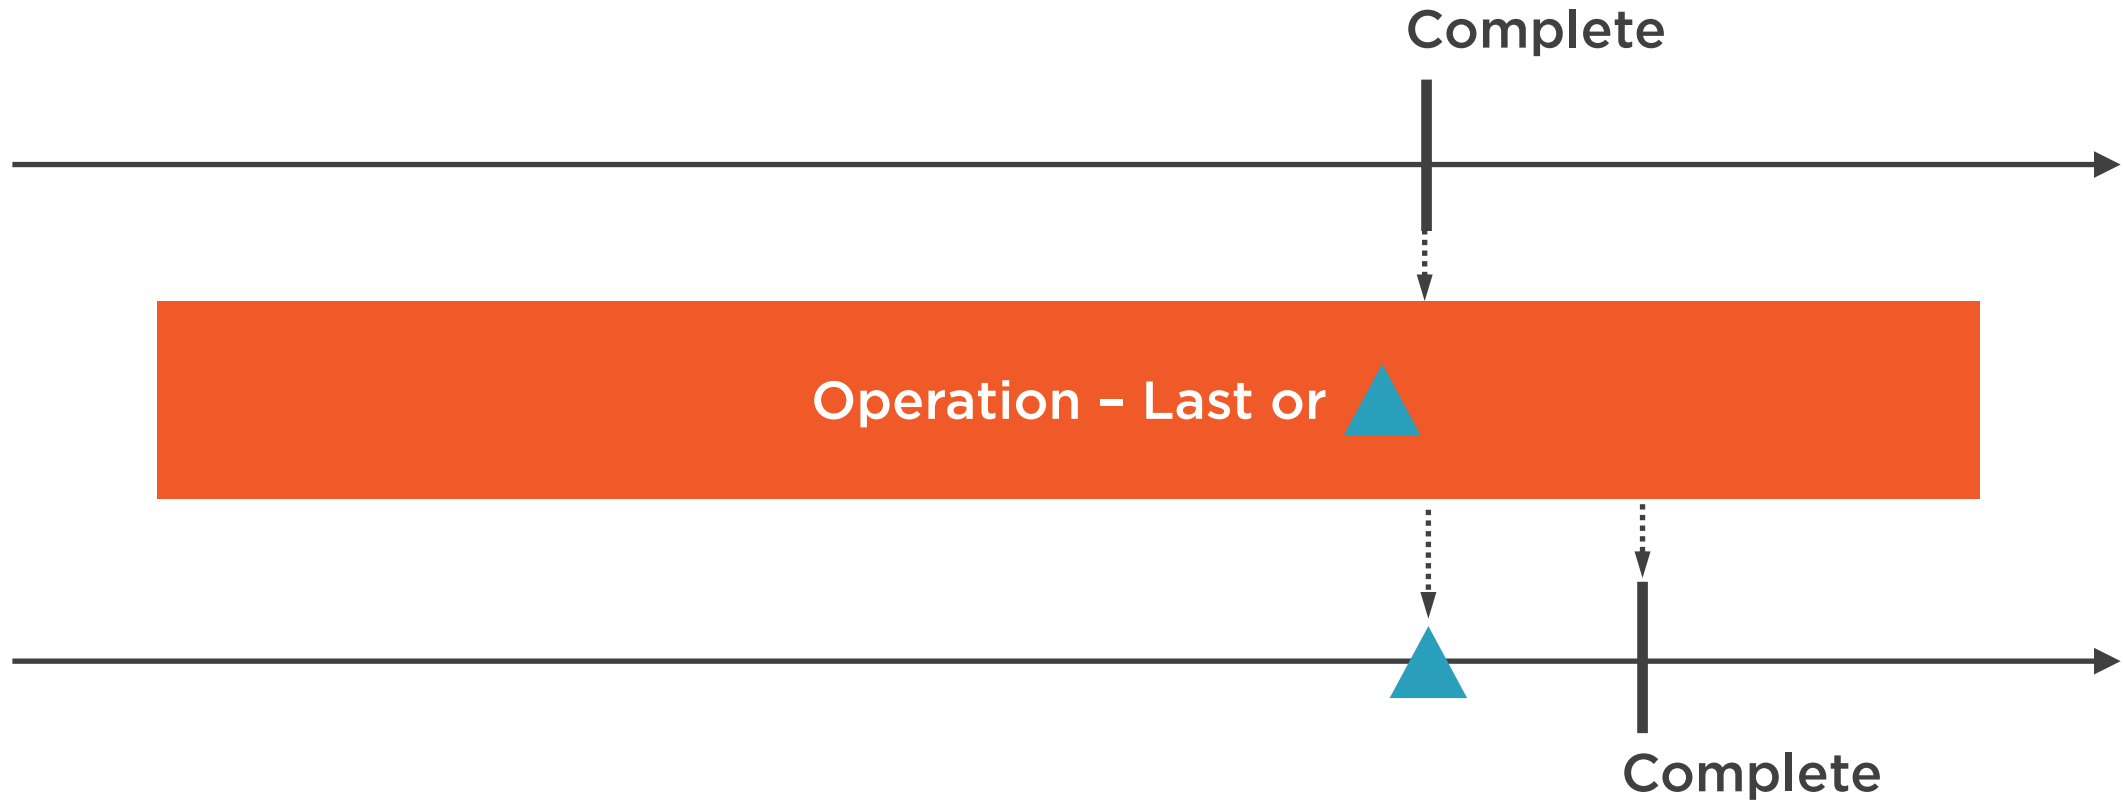

“firstElement” Operator

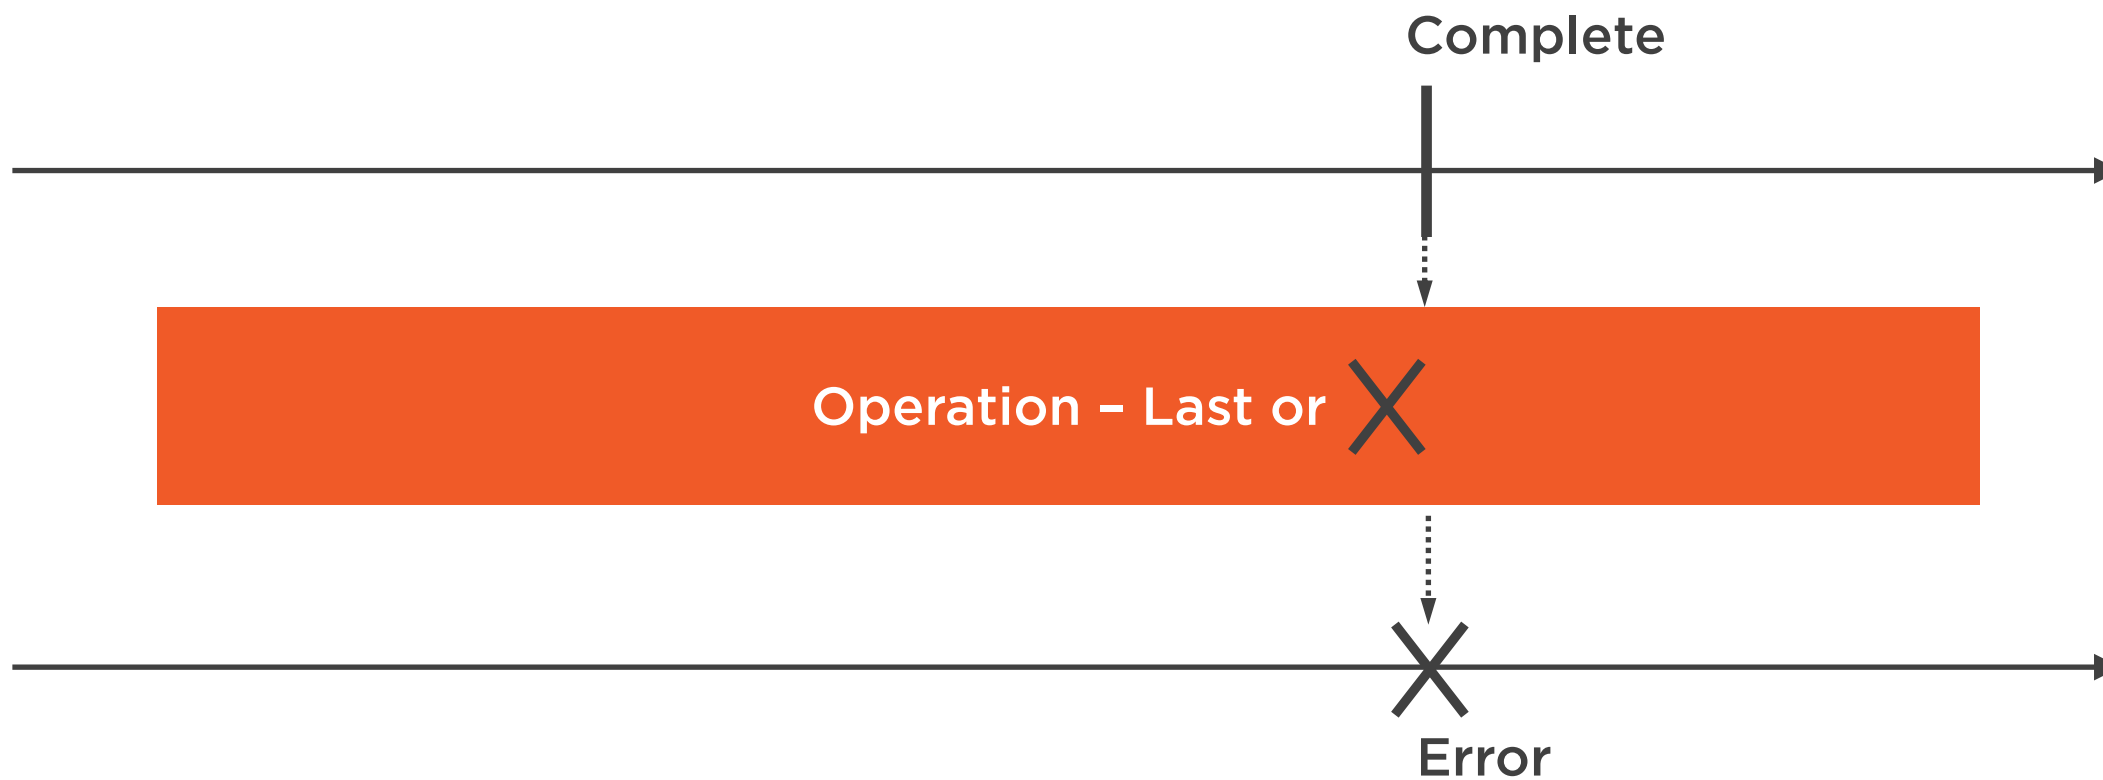

“last” Operator

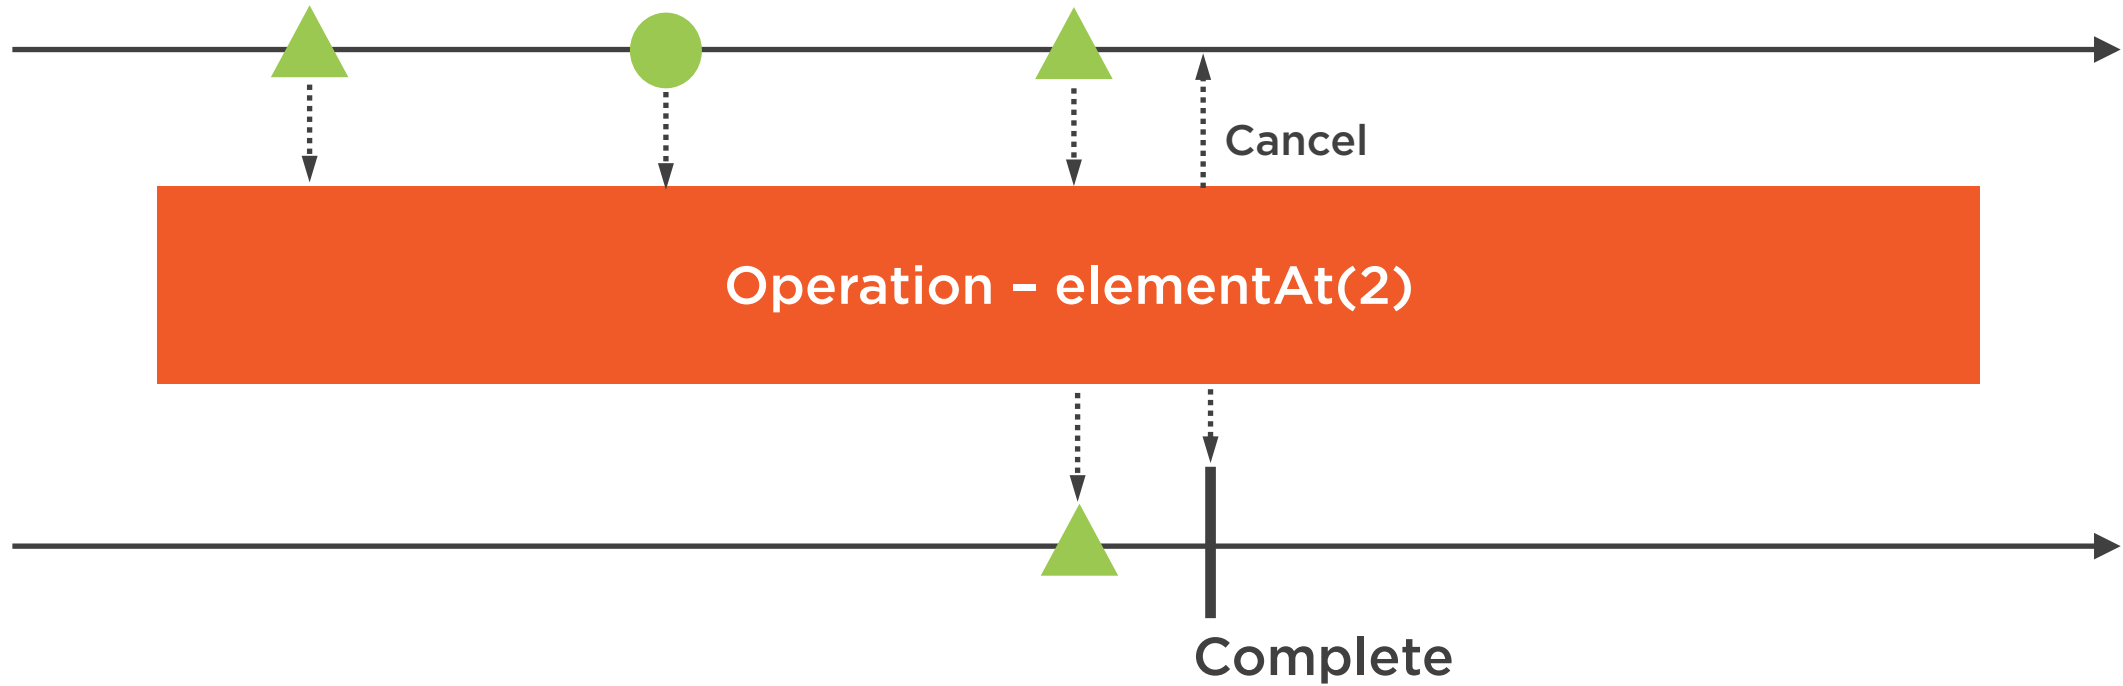

“last” Operator

“lastOnError” Operator

“elementAt” Operator

Demo

Positional Operators

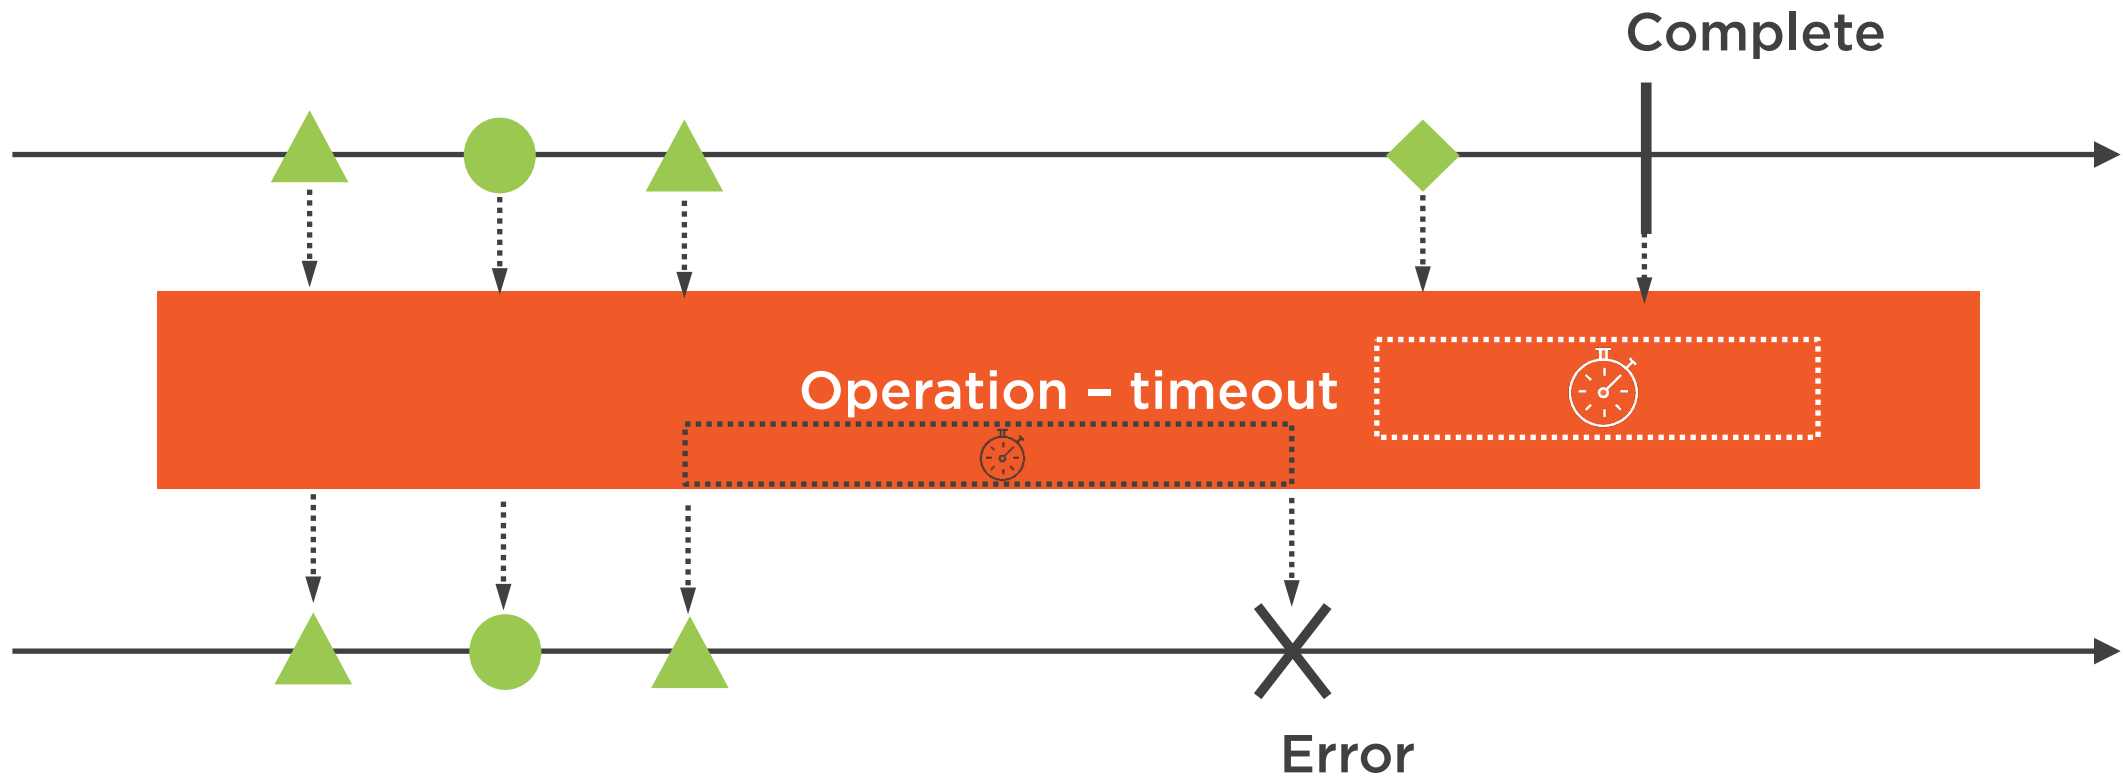

- first
- firstOnError
- firstElement
- last
- lastOnError
- elementAt

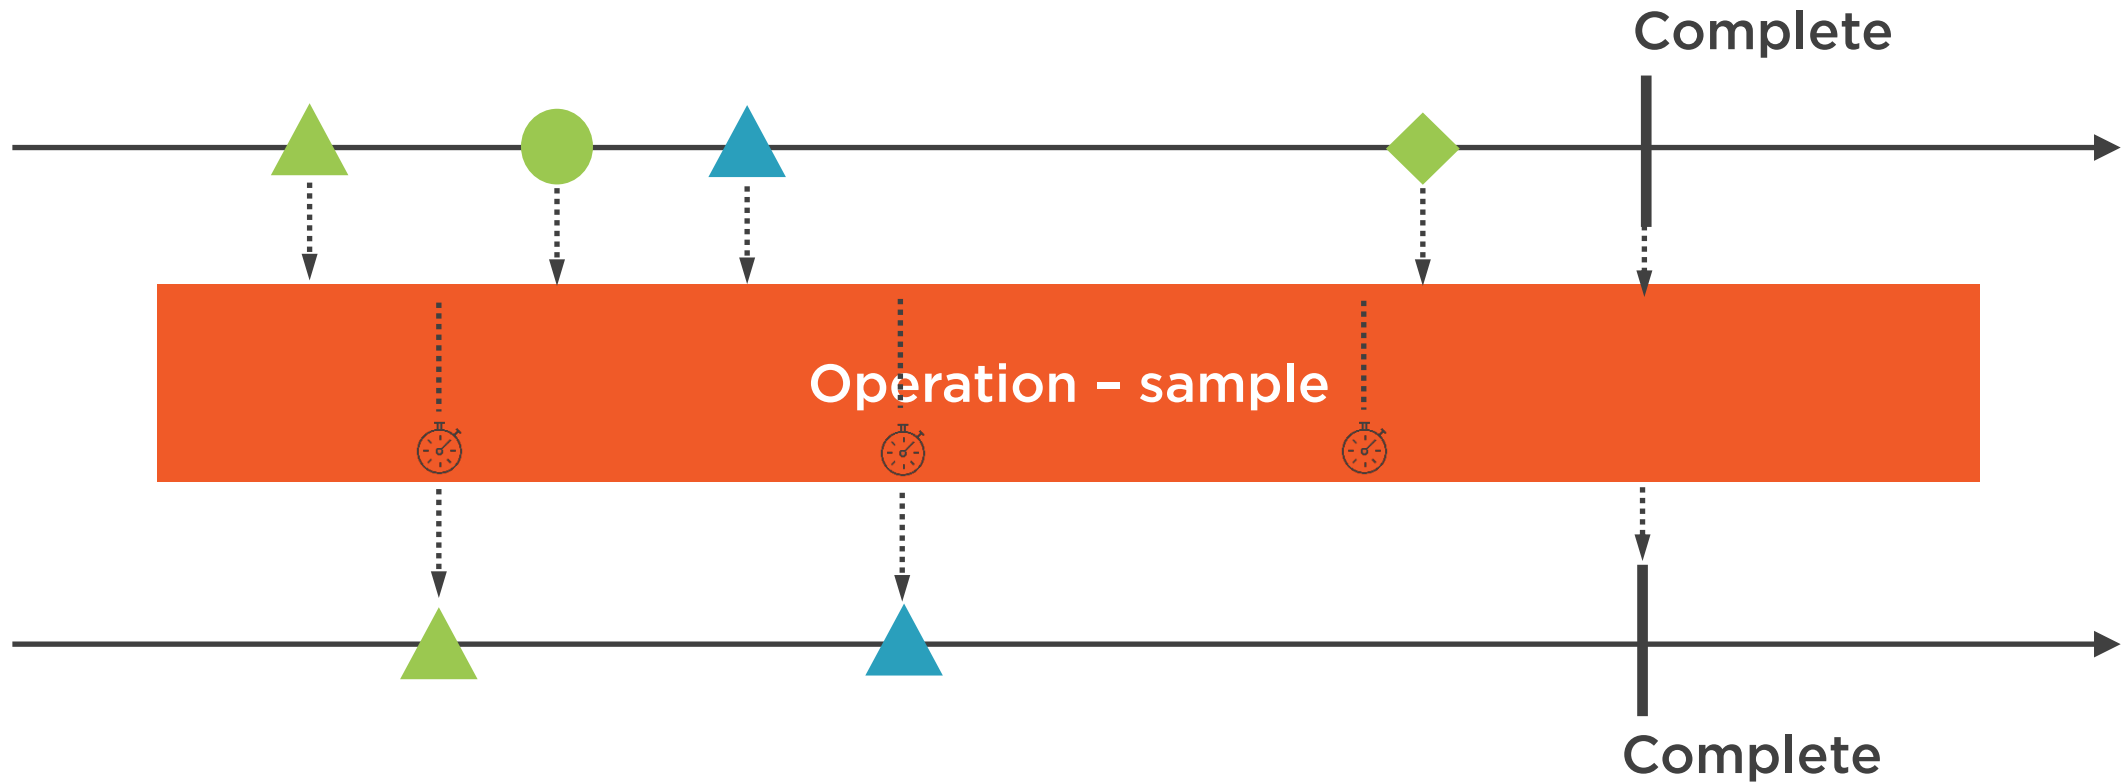

Time-Based Operators

“timeout” Operator

“sample” Operator

Demo

Time-based Operators

- timeout
- sample
